

TideLift

Command the catch. Never touch the truck.

BRAND GUIDELINES

DIRECTION — CONTROL TOWER (TIDE PALETTE)

TideLift is the AI supply-chain control tower that turns surplus catch into food bank meals — every agent recommends, a human always decides.

PRIMARY SEGMENT

Investors & hackathon judges deciding whether this is fundable, real-world infrastructure.

SECONDARY SEGMENT

Food bank operations directors and cannery / processing partners who would run this daily.

ANCHOR PERSONA

A warehouse & transportation operations director sizing up a pilot — the reader ACCFB's own ops leadership represents.

REFERENCE BRANDS — BORROW THIS

Linear

Typographic restraint and confident hierarchy.

Palantir

Command-center gravity, data as the hero.

Stripe

Trust-building clarity for a technical audience.

MISSION

Turn the ocean's surplus into food security — fast enough, and honestly enough, for anyone to trust the decision.

VALUES

- 01 Recommend, never execute.
- 02 Speed is the mission.
- 03 Radical auditability.
- 04 Built for the dock, not the demo.
- 05 Quietly serious.

WHY THIS EXISTS

Every year, millions of pounds of perfectly good seafood get left on the dock — not because anyone wants it wasted, but because no one can make the call fast enough. A vessel radios in a catch. A food bank needs to know, in minutes, whether it's safe, whether it's worth the drive, whether the cold chain will hold.

TideLift was built for that gap: the space between a fresh catch and a fed family, where speed and trust have to hold at the same time. Seven agents score the lot, draft the offer, match the facility, and plan the route — every one of them showing its work, none of them touching the truck.

We're not building autonomy for its own sake. We're building the fastest honest recommendation in the cold chain.

TideLift

TideLift

PRIMARY · HORIZONTAL · STACKED

THE MARK

Three ascending bars topped by a beacon dot – a signal readout climbing like a tide gauge. Reads at 16px and 512px alike.

WORDMARK

"TideLift" in Space Grotesk Bold, mixed case, tight tracking ($-0.01em$). Compact label variant – "TIDELIFT" all-caps, wide tracking ($0.28em$) – for nav bars, badges, and tight UI chrome.

CLEAR SPACE & USAGE

Minimum clear space on all sides equals the height of the beacon dot. On dark surfaces (Slate Ink, Deep Tide): Salmon mark, Foam wordmark. On light surfaces (Foam): Slate Ink mark and wordmark.

TideLift

TideLift

Never stretch the mark

Never rotate off-axis

Never place on a busy
background without a
solid chip

Never recolor outside the
documented set

Never add a drop shadow
or glow

TYPEFACES

Space Grotesk

Display. Headlines, wordmark, section titles. Weights 500 / 700.

IBM Plex Mono

Body & data. Every metric, log line, and label. Weights 400 / 500 / 600.

USAGE RULES

Numbers are always IBM Plex Mono – tabular figures read as verified data. Headlines never run past two lines; cut the sentence instead. Minimum body size in product UI is 14px.

HEADLINE

"Command the catch. Never touch the truck."

BODY

"Every recommendation ships with its reasoning. Nothing executes without your approval."

PRIMARY BUTTON

Review recommendation

SECONDARY BUTTON

View audit trail

ERROR STATE

"Dispatch paused – sensor reported 4.6°C on lot 0043. Confirm before proceeding."

SOCIAL CAPTION

"38,400 lbs of surplus salmon. One human approval. 32,000 meals to ACCFB."

FORBIDDEN

"revolutionary" • "game-changing" • "seamless" • "AI-powered" as a standalone claim • "disrupt" • exclamation points in product UI • "simply" / "just" – never minimize real operational complexity.

SUBJECT

Real people doing real cold-chain work – vessel crews, dock teams, food bank ops staff, QA technicians. Never models.

LIGHT

Available light only – blue hour, overcast daylight, warehouse fluorescent mixed with window light.

COLOR

Cool-neutral grade. Salmon stays reserved for the product UI, never graded into the photography itself.

CAST / DIVERSITY

Every multi-image set shows racial diversity and varied body types – never a default cast.

TEXTURE

Visible film grain, imperfect framing, off-center editorial composition.

FORBIDDEN

Stock-photo energy, studio strobes, perfect symmetry, AI-smooth surfaces, gradient backgrounds, staged smiles at camera.

Read the pitch

Do

Lead every screen with a real number (lbs, meals, °C) – the product's credibility is in specifics.

Keep the beacon mark's three bars at their fixed proportions – never stretch or re-space them.

Log every agent action in mono type – it signals audit-grade truth, not decoration.

Leave generous dark negative space around data – density needs air to stay readable.

Use salmon like a signal light – one call to action per screen, not a wash of color.

Don't

Auto-execute anything in copy or mockups – every flow ends at a human approval step.

Recolor the beacon mark to anything outside salmon-on-dark or Slate-Ink-on-Foam.

Add drop shadows, gradients, or glassmorphism – the system is flat and precise.

Caption photography with marketing language – captions state facts, not vibes.

Let Space Grotesk headlines run past two lines – cut the sentence instead.
